Variable Attenuators

Models 3003, 3006, 3007, 3010, & 3014  dc to 2.5 GHz
Manual Step, Ruggedized SMA Connectors  1 Watt

Features

- **New Models** - Models 3053 & 3054 offer an extended frequency range to 6 GHz.
- **Available Express Models:**
  - 3003-100
  - 3010-100
  Other models may be available for Express delivery.
- **High Reliability** - Repeatability better than 0.1 dB over frequency range and life. Weinschel patented detent mechanism, tested to 1,000,000 operations at +75°C, operates dependably even down to -40°C.
- **Product Uniformity** - High volume fabrication techniques, including injection molding, stamping, broaching and thick film printing ensure a cost effective and uniform product.
- **Low Frequency Sensitivity** - Typically 0.1 to 0.2 dB up to 2.5 GHz.
- **Shock Resistant** - 100% spring contact system withstands mechanical and thermal shock and eliminates the need for epoxy or solder.
- **Wide Selection** - Wide choice of attenuation ranges and increments in standard stock models. Single and dual drum configurations available.
- **Knob Included** - Knobs for both single and dual drum models are included with every attenuator. Characters are screened on the face of the knob insert which is coated with a clear layer of epoxy for protection.

Special Configurations

Some modifications to the basic configuration of the 3000 Series can be made during manufacturing. Examples of these special configurations are shafts having special lengths and ends; clockwise shaft rotation; modified mounting arrangements; and provisions for add-on items such as concentric potentiometer and ganged switches.
