Classic UNIDAPT™ Adapter Kit

Our Universal Adapter is the Key
Each UNIDAPT™ fitting has a common connector end and a universal adapter end. Simply choose the two common connector ends you need, and screw them together with the universal adapter.

Our classic universal adapter kit let you mix and match any 2 male or female coaxial fittings. Build the perfect adapter or cable assembly for the job—male to male, male to female, or female to female. All Unidapt™ sections are made of silver-plated machined brass with a gold-plated phosphor bronze contact anchored in a PTFE dielectric.
